ATTACHMENT 2. USE OF RESOURCES OUTSIDE OF GLNPO REGION

Attachment 2—Use of Resources Outside of GLNPO Footprint

Use of Team Resources—As shown in Attachment A1, the EA Team is equipped with a broad range of technical disciplines and skills and are committed to the execution of the GLNPO GLAES contract within Great Lakes Region

within Great Lakes Region.

Use of Additional Resources Outside the Great Lakes Basin—The EA Team is committing Key Personnel (identified in Sections D and E of this SF330) that reside outside of the GLNPO footprint. The EA Team will staff each task order with the most appropriate and qualified personnel for every aspect of a project. dditional personnel With nationwide and our team's task order staffing plan (outlined in Section H), any and all personnel necessary for successful program and project execution will be immediately available when and where needed.

We currently hold open Task Order assignments where we have utilized resources from other regions because they were the most qualified person for the job, and EA currently uses this technical approach on our 30 IDIQ contracts for federal agencies. We remain committed to the same work practices under the GLAES and will pull the most qualified resources on a project.

EA builds adequate administrative and technical support into our workload projections; however, we understand that workloads can be sporadic and change due to unforeseen circumstances. It is not uncommon to experience workload fluctuations caused by weather, funding, or regulatory issues. We have the ability to deal with such issues through reassignment/redistribution of workload. limited overtime work for short-term increases, use of EA employees from other offices, and new hires. EA's innovative staffing plan also ensures that the staffing levels are appropriate to the requirements at hand. We can accommodate normal and fluctuating workloads throughout the life of the contract by:

Utilizing an established Program Mgt.
 Office (PMO) in Deerfield, IL
